## HOME THEATRE *necessities*

Tricia Spears

Accell UltraAV™

Accessories—you can't leave home without 'em (well, at least us women can't). But in this case, you don't have to. These handy little "gotta haves" are for use in the comfort of your own home. And, just so no one thinks I'm playing favorites, they're listed alphabetically.

Available from **Accell** is the new **UltraAV™ HDMI 2-1 Audio/Video Switcher**. Ideal for connecting two HDMI video sources, such as a DVD player and satellite system, to a video display, the product is fully HDCP compliant, backward compatible, and supports high-definition video in resolutions of up to 1080p, as well as multichannel digital audio. While most switches serving this need are bulky and expensive, this little (two inches square, and under one inch deep) beauty costs only \$99.99. Included with the Switch is a programmable wireless remote and an easily mounted infrared sensor. For more information on the AV Switcher, phone 510 438 9288 or visit [www.accelcables.com](http://www.accelcables.com).
